Date Submitted: **10/29/19**

Task 01:

In this task, I am to receive and transmit the recorded temperature using the internal temperature sensor and then display it on the terminal. As seen below.

Task 02:

In this task, I interfaced with the WS2818B 1x8 RGB LED strip with the TIVAC using SPI interface. It will light up R, G, B, RG, RB, GB, RGB.
